## About Me

I was into computers, even when I was a kid. Since my memories last, my father was working in IT. I was always curious about what he was actually doing and why it was working. Therefore, it was obvious to me that I wanted to study in this field.

My primary school teacher suggested the “Neumann János Informatikai Technikum” vocational secondary school. My teachers and fellow students there have contributed to my personal betterment. We have competed in several competitions with a handful of my classmates.

In addition to the competitions, I was involved in extracurricular activities at school. I was part of a “study group” that hosted esports events, even outside the school. We have formed groups and organized parts of an event – like the main stage or an exhibition. I had the opportunity of leading a group.

During the univernity I had the opportunity to teach besides learning. I have been an assistant for multiple teachers and I had the chance to get my own group where I was to only teacher.

## Experience

- FuserWise Kft. – Developer internship (2023-2024)
- University of Szeged– Assistan techer (2023-2025)
- Mattesz Baby Spa – Webadmin (2023-)

## Education

University: Computer Science Engineering BSc @ University of Szeged, Faculty of Science and Informatics (2022-2026)
